

bet win

Aviator is a game of chance that generates its numbers using the random number generator (RNG) algorithm. The specific details of the RNG algorithm used by Aviator may not be publicly disclosed, but it is designed to produce random and unpredictable results.

Some sources claim that Aviator has a house edge of approximately 1.5%, so for every \$100 you bet, you can expect to win approximately \$98.50 on average.

The mathematical formula for Aviator bets is as follows: $Winning = (Payoff - Bet) * Bet$. What is the working polynomial formula that one can use in Aviator... Quora: Who is the... 0}
