<p&gt;Rules applicable to all Poker Games&lt;/p&gt;
<p&gt;Poker Equipment&lt;/p&gt;
<p&gt;Originally Poker was played with a&lt;/p&gt;
<p&gt; standard 36 card Piquet deck of playing cards. &#127819; Most games t
hese days are played with a</p&gt;
<p&gt; standard 52 card deck. The Ace ranks high except that it can &#127819;
 also be used low in a</p&gt;
<p&gt; &quot;straight&quot; or run of cards i.e. Ace, 2, 3, 4, 5. Some kind o
f 🍋 tokens to bet with are</p&gt;
<p&gt; required and conventionally these are round chips - sets of Poker chip
s are easily</p&gt;
<p&gt; obtainable &#127819; these days and vary from very cheap to extremely
high quality sets of great</p&gt;
<p&gt; value. A dealer chip called a &#127819; &quot;blind&quot; is also usu
ally used to indicate the current</p&gt;
<p&gt; dealer (or at Casino tables, to indicate who plays first).&lt;/p&gt;
<p&gt;Poker Objective&lt;/p&gt;
<p&gt;Poker &#127819; is&lt;/p&gt;
<p&gt; totally a gambling game and unlike some other gambling games cannot re
ally be played</p&gt;
<p&gt; without stakes. The stakes do &#127819; not need to be money - peanut
s, sweets or matchsticks</p&gt;
<p&gt; will work fine, although seasoned gamblers will sneer at anything &#12
7819; other than serious</p&gt;
<p&gt; stakes. The aim for a hand is to win by having the highest ranked hand
of cards 🍋 or else</p&gt;
<p&gt; by continuing to bet that your hand is the highest until all the other
players drop</p&gt;
<p&gt; out. The &#127819; player who is left when all the others have droppe
d out or the player who has</p&gt;
<p&gt; the highest ranked hand &#127819; when the hands are shown wins the &
quot;pot" - all the money that</p&gt;
<p&gt; has been bet during that hand. In &#127819; the event of a draw, the
pot is divided equally</p&gt;
<p&gt; amongst players.&lt;/p&gt;
<p&gt;Poker Scoring Hands&lt;/p&gt;
<p&gt;There are nine ranking Poker hands. We &#127819; list them&lt;/p&gt;
<p&gt; below in ascending order: One Pair - 2 cards of the same value The han
d with the higher</p&gt;
<p&qt; &#127819; value pair wins. If they are the same, then the highest val
ue card in the remaining 3</p&gt;
<p&gt; cards determines who &#127819; wins. If they are also the same, the h
ighest value card in the</p&gt;
<p&gt; remaining 2 cards determines who wins and &#127819; so on.&lt;/p&gt; &lt;p&gt;Two Pairs - 2 different value pairs&lt;/p&gt;
```

<p&gt; The hand with the highest value pair wins. If they are the &#127819;

same, then the value of the</p&gt;
